

Dear FCC--

I am concerned to hear that Sinclair Broadcasting, one of the largest owners of local broadcast T.V. stations, has ordered their stations to preempt their normal schedule with an anti-Kerry documentary. As far as I know, they have no plans to balance this action with the broadcast of any documentary showing an opposing view. This, to my mind, makes their action politically motivated, and does not serve the public interest. I feel this is an unfortunate result of media consolidation into the hands of a few large companies.

I ask that you consider the need to improve media ownership criteria so that it will better serve the people of our country, specifically with regard to keeping the flow of impartial information free and unfettered by the political agenda of large conglomerates.

Thank you.
